ANAS WAHAB | CHIEF OF STAFF (AI & DATA-DRIVEN STRATEGY)

Location: Pune, India (Immediate Relocation from Mumbai) | **Email:** anas@ainexlifyagencies.com | **LinkedIn:** linkedin.com/in/anaswahab97 | **GitHub:** github.com/anaswahab231997

EXECUTIVE PROFILE & FOUNDER LEVERAGE

Technical operator and **Chief of Staff candidate** with 4+ years of cross-functional experience bridging commercial strategy, e-commerce operations, and autonomous systems. Acts as an executive force multiplier for founders—translating high-level company goals into operational execution without consuming core engineering sprint points. Fluent in the **Shopify ecosystem** and modern automation stacks (**Python, Node.js, PostgreSQL, LoopGuard, webhooks, LLM APIs**). Proven track record of eliminating operational friction, architecting customer intelligence workflows, and executing rapid zero-to-one initiatives.

STRATEGIC & TECHNICAL ARSENAL

- **Executive & Operations Strategy:** Cross-Functional Program Delivery, Operational Integration, OKR Tracking, Funnel Economics (CAC, LTV, Churn), Vendor & Contract Negotiations
- **E-Commerce & Digital Systems:** Shopify Admin/Storefront APIs, App Store Dynamics & ASO, Variant Management & Liquid Architecture, Multi-Store Operations
- **Autonomous Automation & AI:** Python, Node.js / Express 5, Production LLM APIs (Gemini, Claude, OpenAI), Dynamic Schema Validation, Prompt Engineering
- **Data Intelligence & Security:** PostgreSQL (`asyncpg`), AES-256-GCM Token Encryption, Webhook Ingestion, Stateful Deduplication (LoopGuard), HubSpot, Slack APIs

KEY STRATEGIC OPERATIONAL SYSTEMS & CONTRIBUTIONS

Automated Merchant Intelligence & Lead Dispatcher ("Layla")

- **Strategic Problem:** Inbound high-value enterprise leads suffered 45+ minute response latency, leading to lost conversion opportunities and fragmented attribution across sales and support.
- **Architecture & Automation:** Architected an event-driven inbound qualification agent utilizing webhook ingestion, multi-tier LLM intent scoring, and real-time CRM routing.
- **Reliability & Safeguards:** Implemented stateful in-memory deduplication with disk persistence (`LoopGuard`) to eliminate duplicate webhook triggers, dynamic priority escalation, and automated exception alerting.
- **Measurable Results:** Compressed speed-to-lead response time from **45+ minutes to <25 seconds**, providing 100% clean pipeline visibility to leadership.

Unstructured Data Extraction & Financial Reconciliation ("Invisible Accountant")

- **Strategic Problem:** Multi-format billing and invoice reconciliation creates severe manual operational drag, stalling leadership reporting and monthly financial close.
- **Architecture & Automation:** Built an automated ingestion pipeline using multi-modal LLM vision, dynamic Pydantic runtime schema metaprogramming, and a PostgreSQL (`asyncpg`) backend.
- **Resilience & Governance:** Enforced SHA-256 payload hashing for 0% duplicate entries, token-constrained Chart of Accounts enum extraction, and AES-256-GCM token encryption.
- **Measurable Results:** Reduced financial document turnaround to **<45 seconds**, eliminating duplicate billing entries through deterministic validation.

Upstream Open-Source Security Contribution (`BerriAI/litellm#42490`)

- **Vulnerability Solved:** Identified and patched cross-provider bearer credential exposure when routing Anthropic OAuth requests through custom proxy endpoints.
- **Implementation:** Authored patch in `common_utils.py` scoping tokens strictly to `api.anthropic.com` with comprehensive unit test coverage. Status: **In-Review (Closes Issue #42172)**.

PROFESSIONAL EXPERIENCE

Cashmerean (Luxury B2B) | Founder & Director of Operations **| Sep 2023 – Present**

- Directed B2B operations and supply chain management for a luxury brand, utilizing data-driven systems to optimize fulfillment pipelines.
- Managed vendor agreements, inventory allocation, and fulfillment coordination across international commercial logistics channels.
- Integrated digital marketing automation into daily operational workflows, bridging digital strategy with operational efficiency to streamline multi-channel fulfillment.

Content Garage | Senior Digital Marketing Head **| May 2019 – May 2023**

- Led cross-functional digital marketing teams, managing targeted growth strategies and multi-channel acquisition funnels over a 4-year tenure (last salaried role).
- Leveraged data analytics and marketing automation platforms to scale client ROI, driving consistent increases in qualified lead generation.
- Managed campaign budgets, client reporting, and acquisition performance across multi-channel client accounts, reducing blended CAC by 22%.
- Partnered directly with founders to streamline quarterly growth roadmaps, sprint priorities, and vendor negotiations.

EDUCATION

Bachelor's in Mass Media | Thakur Degree College (2016 – 2019)

Specialization in strategic communication, stakeholder management, and high-impact organizational alignment.
