ANAS WAHAB | CHIEF OF STAFF (AI & DATA-DRIVEN STRATEGY)

Location: Pune, India (Immediate Relocation from Mumbai) | **Email:** anas@ainexlifyagencies.com | **LinkedIn:** linkedin.com/in/anaswahab97 | **GitHub:** github.com/anaswahab231997

EXECUTIVE PROFILE & FOUNDER LEVERAGE

Technical operator and **Chief of Staff candidate** with 4+ years of cross-functional experience bridging commercial strategy, e-commerce operations, and autonomous systems. Acts as an executive force multiplier for founders—translating high-level company goals into operational execution without consuming core engineering sprint points. Fluent in the **Shopify ecosystem** and modern automation stacks (**n8n, Python, Supabase/PostgreSQL, webhooks, LLM APIs**). Proven track record of eliminating operational friction, architecting customer intelligence workflows, and executing rapid zero-to-one initiatives.

STRATEGIC & TECHNICAL ARSENAL

- **Executive & Growth Strategy:** Cross-Functional Program Delivery, Post-Merger Operational Integration, OKR Tracking, Funnel Economics (CAC, LTV, Churn), Strategic Merchant Retention
- **Shopify & E-Commerce Ecosystem:** Shopify Admin/Storefront APIs, App Store Dynamics & ASO, Variant Management & Liquid/Theme Architecture, Multi-Store Operations
- **Autonomous Automation & AI:** n8n (Event-Driven), Python, Production LLM APIs (OpenAI, Gemini), Structured JSON Schema Validation (`strict: true`), Prompt Engineering
- **Data Intelligence & Systems:** Supabase (PostgreSQL), Row-Level Security (RLS), Webhook Ingestion, Idempotent Processing, Dead Letter Queues (DLQ), HubSpot, Slack APIs

KEY STRATEGIC OPERATIONAL SYSTEMS

Automated Merchant Intelligence & Lead Dispatcher ("Layla")

- **Strategic Problem:** Inbound high-value enterprise leads suffered 45+ minute response latency, leading to lost conversion opportunities and fragmented attribution across sales and support.
- **Architecture & Automation:** Architected an event-driven inbound qualification agent utilizing webhook ingestion, multi-tier LLM intent scoring, and real-time CRM routing.
- **Reliability & Safeguards:** Implemented idempotent webhook verification to eliminate duplicate records, dynamic priority escalation, and automated Slack exception alerting.
- **Measurable ROI:** Compressed speed-to-lead from **45+ minutes to <25 seconds**, lifted **demo conversion by +38%**, and provided 100% clean pipeline visibility to leadership.

Unstructured Data Extraction & Financial Reconciliation ("Invisible Accountant")

- **Strategic Problem:** Multi-format billing and invoice reconciliation created 35+ hours of weekly operational drag, stalling leadership reporting and monthly financial close.
- **Architecture & Automation:** Built an automated ingestion pipeline using multi-modal LLM vision, deterministic Python math verification, and a **Supabase (PostgreSQL)** backend.
- **Resilience & Governance:** Enforced SHA-256 payload hashing for 0% duplicate entries, strict JSON Schema outputs, and strict PostgreSQL Row-Level Security (RLS) data isolation.
- **Measurable ROI:** Reduced financial processing turnaround from **4 days to <45 seconds**, eliminating **35+ hours/week of manual overhead** at **99.2% extraction accuracy**.

PROFESSIONAL EXPERIENCE

AI Nexlify Agencies | Principal AI Operations & Strategy Consultant | **2023 – Present**

- Functioned as strategic right hand to leadership across fast-scaling tech companies, diagnosing cross-departmental bottlenecks and architecting self-healing automated workflows.
- Engineered custom internal tools and data synchronizations connecting disparate CRMs, analytics platforms, and communication channels without requiring dedicated engineering hires.
- Built automated customer telemetry and churn-alert pipelines, identifying at-risk accounts 14 days prior to subscription renewal dates to protect recurring SaaS revenue.
- Standardized operational SOPs and generative AI validation frameworks, driving down automated workflow error rates below 1%.

Digital Marketing & Operations Manager | E-Commerce & Digital Growth Roles | **2019 – 2023**

- Directed cross-functional execution across product marketing, store operations, and conversion optimization for high-growth e-commerce ventures.
- Managed Shopify store operations, product variant catalogs, and checkout funnel integrations, coordinating directly with developers to resolve theme and app compatibility issues.
- Reduced blended Customer Acquisition Cost (CAC) by 22% through systematic funnel analytics, automated lead routing, and behavioral cohort segmentation.
- Partnered directly with founders to streamline quarterly growth roadmaps, sprint priorities, and vendor negotiations.

EDUCATION

Bachelor's in Mass Media | Thakur Degree College (2016 – 2019)
Specialization in strategic communication, stakeholder management, and high-impact organizational alignment.
